- Pitched roof available, brick finish, cedar clad options

Anti-vandal Buildings

Details and Facilities

Pasuda has developed a **STEEL ANTI-VANDAL BUILDING** with a modular framework, allowing for unlimited design all compliant to current regulations.

All of our buildings are available in a variety of external finishes and can be further enhanced with features such as brick finishes, pitched tiled roofs, etc.

By utilising the experience of our Design team, your required internal layout and fit-out is completed off-site and the building delivered ready to use.

Our modular steel anti-vandal buildings can be used for sports facilities, allotments and recreation and vulnerable exposed sites.

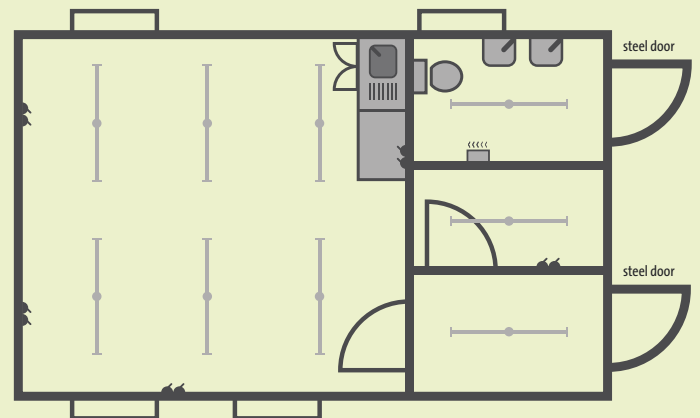

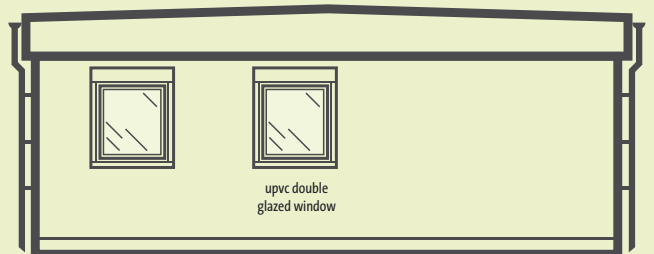

Hire, sale or individually designed purchase options available

ABOUT US Since 1981 we have developed a Group of Companies all specialising in the Modular Buildings industry thereby giving us all the resources necessary to satisfy the most stringent of requirements. We can offer full turn-key packages from groundworks and service connections to a finished building – all project managed under one roof.

Should you have any specific project currently under consideration we would welcome the opportunity in offering our services.
