

Modular Buildings Case Study

DONCASTER ROVERS FC

Hire, sale or individually designed purchase options available

PROJECT: Gym complex

CLIENT: Doncaster Rovers FC

Following the club's magnificent achievement in reaching The Championship there was an immediate requirement to upgrade its training ground facilities.

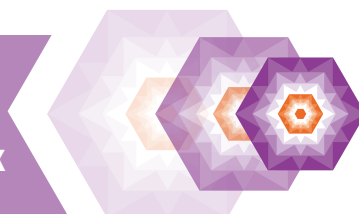

The club identified the need to improve the existing fitness and gymnasium facilities and approached Pasuda to provide a building to satisfy this requirement within a budget framework and strict time scales.

Pasuda's solution was to provide a refurbished modular building, which included the augmentation of the floor loadings to handle the rigour of a fully functional gymnasium.

The project was completed within two weeks and fully operational for pre-season training.

'The units have made such a difference to the amenities at the training ground. We can now offer the players not only a fully functional gymnasium but also an essential medical room. The buildings only provide a simple extension to the grounds existing changing rooms but also now provides more vital facilities in place for teams benefit.'

Steve Uttley, Media Manager
