## LEICESTER TIGERS RUGBY CLUB

Hire, sale or individually designed purchase options available

**PROJECT:** New Office Complex

**CLIENT:** Leicester Tigers Rugby Club

Over the past few years Rugby Union has undergone somewhat of a revolution. As one of Europe's leading clubs, Leicester Tigers have been at the forefront of this transformation. The development of their Weldon Road ground is crucial to the club's future plans and started with a requirement for new office space.

The required facilities were limited to the available space and Pasuda's three-storey design provided the ideal solution. Limited access determined the delivery timescale and these constraints were overcome with the three storeys being delivered in one day. The new office provides superb air-conditioned facilities with the added bonus of spectacular views on match day.

'We are now able to accommodate 21 members of our staff in a environment that has comfort cooling, insulation and picture window with views across pitch. Because the building is relocatable we will be able to relocate when required. We would recommend any organization with similar needs to consider the products of Pasuda Buildings'

Charles Rayner, Head Of Stadium Operations
